

Project Name: Animated online education website design

Project Overview: We will create a responsive online educative website using below tech stack that will help end users/students to enroll for new courses as per their choice and will store the data in no-sql database. Post completion of the website we will host the website on internet(share the basic ideas of Domain and hosting) and how we can store the respective file to GitHub.

Tech stack:

- Html
- CSS
- Javascript
- JQuery
- Bootstrap 5
- Mongo DB

Version Control:

- GitHub

Features:

- Background effect Animation
- Projecting element on window scroll
- Navigation bar toggle effect.
- Service section
- Responsive contact form with Animated Mode
